

RUSHIKESH YASHWANT JADHAV

(507) 581-4046 | rushikesh.y.jadhav@gmail.com | LinkedIn | GitHub | Portfolio

EDUCATION

University of Chicago, Harris School of Public Policy

Chicago, IL

Master of Public Policy (MPP), Data Analytics Specialization

June 2026

- Pearson Fellow: Pearson Institute for the Study & Resolution of Global Conflicts fellowship for students with academic excellence
- Coursework: Advanced Program Evaluation, Econometrics, Advanced Statistics, Machine Learning for Public Policy, Data Visualization, Behavioral Policy and Program Design, Advanced Decision Models

St. Olaf College

Northfield, MN

B.A. in Quantitative Economics, Political Science, International Relations

May 2022

- Davis UWC Scholar: need-based scholarship reserved for United World College graduates; attended United World College in Mostar, Bosnia and Herzegovina, where I conducted refugee assistance work with Jesuit Refugee Service (2018)

TECHNICAL SKILLS

Data & Coding: Python, R, SQL, SAS, Stata, Git, Ruby, HTML, CSS, ArcGIS Pro, NVivo, SurveyCTO

Languages: English (Fluent), Hindi (Fluent), Marathi (Fluent), Bosnian (Conversational)

PROFESSIONAL EXPERIENCE

Cook County Bureau of Economic Development

Chicago, IL

Data and Policy Analyst

July 2026 – Present

- Engineered a Power BI dashboard incorporating geospatial analysis to track homelessness sheltering program performance for 14 district commissioners, translating 6 years of service data into decision-ready visuals
- Developed and standardized a bureau-wide program evaluation strategy, establishing consistent monitoring and evaluation practices across 40+ programs
- Deliver ad hoc data analysis, source verification, and cartographic support for county departments and publicly elected officials

World Bank Group, Development Impact Evaluation (DIME)

Washington, DC (Remote)

Researcher, Harris Policy Lab — DIME Client Practicum

Mar. 2026 – June 2026

- Quantified causal treatment effects of a school feeding program across 4 countries and 4 development outcomes, applying pooled OLS regression to multi-country RCT panel data in Python
- Automated version-controlled data cleaning, merge, and regression pipelines, cutting analysis turnaround and delivering client-ready reports directly to senior economists
- Identified consistent gains in attendance, dietary diversity, food security, and wellbeing across all 4 countries, but no corresponding gains in literacy or numeracy, a finding that shaped recommendations on program design tradeoffs

Cook County Assessor's Office (CCAO) — GitHub

Chicago, IL

Research Assistant

Jan 2026 – Mar 2026

- Quantified the fiscal impact of Tax Increment Financing (TIF) districts on municipal revenue by querying large-scale property databases in SQLite and R
- Constructed reproducible data pipelines and interactive choropleth maps analyzing annexation patterns, TIF revenue, and local tax levies; findings were adapted into a reusable countywide analysis template

United Nations Development Programme, Data, AI, and Innovation Hub

New York, NY (Remote)

Data for Global Development — Internship

Aug 2025 – Dec 2025

- Designed data-to-policy capacity-building curriculum for 35 government officials across 3 countries, translating AI and data science concepts into frameworks for employment and water resource policy
- Authored a data governance report for Uzbekistan's national digital transformation program, converting an infrastructure gap analysis into concrete cross-agency interoperability recommendations
- Conducted due diligence and risk assessment on public-private data partnerships, evaluating alignment with development objectives and responsible data-sharing standards

Busara Center for Behavioral Economics

Nairobi, Kenya

Research and Advisory — Internship

June 2025 – Aug 2025

- Designed and led a behavioral intervention to reduce child domestic labor across 4 Kenyan counties, owning the research lifecycle from survey design through enumerator training and data collection
- Modeled treatment effects using statistical methods and NVivo-based qualitative coding; produced Python visualizations for philanthropic and NGO stakeholders

Acumen, LLC

Washington, DC

Data and Policy Analyst — Statistical Programmer

Oct 2022 – May 2024

- Analyzed 4.4M+ Medicare claims records using SAS, SQL, and Stata, identifying \$500M in cost savings for the Centers for Medicare and Medicaid Services (CMS) through fraud, waste, and abuse detection
- Developed and quality-assured statistical models across 600+ procedure cost evaluations quarterly, catching errors before delivery to federal clients
- Authored briefs translating quantitative findings into actionable recommendations for senior CMS officials, producing methodological documentation to ensure research reproducibility

PLOS ONE

Contributing Author

2023

- Gold, M., Binder, S., & Nolte, C. (2023). Expanding the coverage and accuracy of parcel-level land value estimates. *PLOS ONE*, 18(9), e0291182.

PROJECTS

Gondan Diaries — GitHub

Ruby on Rails, OpenAI API, Google Maps API, Supabase, Render

- Developed and deployed a full-stack travel journaling application integrating an LLM-powered writing assistant via the OpenAI API with geolocation and persistent cloud storage

Global Protest Tracker Visualization — GitHub

Python, D3.js

- Created an interactive data visualization of global protest movements using Carnegie Endowment for International Peace data, translating a large cross-country dataset into an accessible public tool

Aravalli Hills Geospatial Pipeline — GitHub

Python, GeoPandas, Rasterio

- Assembled a geospatial data pipeline processing satellite raster and vector data to analyze land-use change

Harvard University, ICH Policy Hackathon — Finalist, Top 10 of 401 Global Entries — Portfolio

Stochastic financial modeling for rural credit access

- Modeled stochastic credit allocation strategies for 1.2M farmers in India, recommending an 8% reallocation of priority sector lending to reduce agricultural debt-to-asset ratios; presented recommendations to Indian government officials
